

Year 8 Maths Impact Event Code Breaking

Monday 10th July 2023

Students take part in an investigation to develop their problem solving skills while learning all about ciphers and codes at the same time.

The day started out like every other school day at Reepham High School. The same classes, the same teachers, and the same work. But then the unthinkable happened. It was up to year 8 to solve the coded mystery using their maths skills.
